

A pool with poise

A contemporary pool designed for a fun-loving family that likes to entertain

NESTLED INTO A CORNER OF THE GARDEN

between the home and the property's boundary wall, this contemporary, clean-lined pool is a shimmering example of modern pool design.

The interior surface is clad in vivid-blue Florentine glass tiles, which contrast the pale tones of the paving and the white weatherboard house, creating a fresh, inviting look. Part of the pool is bordered by a raised garden bed, drawing the eye and adding textural interest, with a navy-coloured rendered feature wall providing privacy for swimmers.

Designed by Sean Lynch of Malibu Pools and

Landscapes for family fun and outdoor entertaining, the pool fits seamlessly into what is a relatively small space. To enhance the feeling of connection with the house and to ensure uninterrupted views, the fencing is of frameless glass.

The pool features two underwater benches, which provide adults with a place to relax and children with a place to safely play. Children and adults alike can take delight in the water jets set into the waterline along one side of the pool. These jets shoot arcs of water across the pool, adding a wonderful sense of playfulness.

LED lights set into the feature wall and the underwater benches illuminate the pool at night, creating a stunning view from the second-storey porch. And, because the owners would rather spend their time using the pool than cleaning it, Malibu Pools and Landscapes installed an automatic in-floor cleaning system and the Malibu fresh water system.

Winner of multiple industry awards, Malibu Pools and Landscapes was established 35 years ago and is now one of the country's leading pool design and construction companies. Sean Lynch has been the managing architect for more than 10 years

and his background in environmental architecture and landscape design brings a unique perspective to the design and construction process.

Focusing on a limited number of projects each year, Malibu Pools and Landscapes offers a complete pool and landscape package. This begins with an on-site consultation with Sean Lynch to discuss the client's needs, the design brief and the environmental issues. A virtual 3D design is then created, allowing every project to be created, modified and "swum through" before construction starts.

Malibu Pools and Landscapes uses only in-house trade staff, guaranteeing a professional service and lasting quality of construction. The company services the southeast Queensland region.
